How to Become a Calligrapher

You want to write a fair and decent hand,
To be a master of calligraphy,
A perfect letterer? Then understand:
If you desire in all sincerity

To be a craftsman-scribe, first pray the Lord
To ease your task, and after that prepare
A reed-pen straight and sturdy as a sword,
Apt to the art of inking true and fair.

When you propose to cut and nib your reed,
See that your goal is perfect symmetry;
Examine well both ends, and then proceed
To cut the slenderer end, so that it be

Of moderate length, not over short nor long,
Middling the split—that way you will secure
An equal match both sides. With purpose strong
When you have done all this as firm and sure

As any expert certain of his aim,
Next turn your whole attention to the task
Of fashioning the point, for in this game
The perfect point's the nub of what we ask.

All I will say thereon is: keep the mean
Midway betwixt the angular and the round;
The rest I purpose jealously to screen—
Think not I'll leave this secret to be found.

Devote to this the effort adequate
And you may hope with reason to succeed.
Into your inkwell now precipitate
Soot mixed with vinegar, or the crushed seed

And pulp of unripe grapes, adding thereto
Red ochre well dilute with orpiment
And camphor. When fermented through and through,
Attend to choice of paper, smoothly blent

And clean, well-proven. Cut, then press it well
 So that it will not wrinkle or in time
 Deteriorate. Now comes the patient spell
 Of sedulous imitation, and the chime

Of script with model; only patience brings
 Desire to its fulfilment. Make a start
 First with the slate, and let your labourings
 Be strenuous, yet not hasty, your right hand

Outstretched with resolution to the screed;
 Nothing like courage serves to gain the quest.
 And be not shy if at the first your reed
 Yields naught but ugly scratches. Even the best

Beginner finds things difficult; but then
 The task proves lighter. Comfortable ease
 Many a time ensues on hardship. When
 At last you reach your goal, and prospects please,

Give thanks to God, and His good pleasure do;
 God loves the thankful heart. Moreover, strive
 To have your fingers write the good and true,
 To be your mark, when you're no more alive.

For whatsoever things a man has wrought,
 Upon the morrow he shall surely meet
 When the writ volume of his deeds is brought
 To face him there, before the Judgment Seat.

IBN AL-BAWWĀB

INTRODUCTION

To the Arab and Muslim peoples, calligraphy has always been the queen of arts: and its noblest application has been found in transcribing the Word of God, the Glorious Koran. With calligraphy, the art of illumination has gone hand in hand; religious scruple forbade the embellishment of the holy scriptures with illustrations, so that the entire artistic impulse came to be expressed in the creation of a beautiful script, and its ornamentation by means of fine arabesque patterns.

Though much has been written on Islamic calligraphy and illumination, the detailed history of these arts remains yet to be told; and the time for its telling has hardly come, for the available sources leave too many gaps and too many obscurities, so that vigorous controversy, and a prolonged search for further information, must precede anything approaching finality. The purpose of the present volume is thus ancillary rather than definitive; but it will be seen to be ancillary to an eminent degree, thanks to the materials on which it is based. The Chester Beatty collection of Korans, remarkable equally for size, excellence, and variety, comprises admirable examples of every century and every style, and thus illustrates with astonishing completeness the history of the artistic transcription of the Koran.

What is reported of the materials on which the parts of the Koran were recorded when first revealed—scraps of leather and parchment, stone tablets, camels' shoulder-blades, palm-fronds, and the like—does not encourage the supposition that the script used had yet been artistically developed: neither is careful calligraphy noticeable in any of the ancient inscriptions of Arabia, or the documents from early Islam. The famous bibliographer Ibn al-Nadīm, writing in the last years of the tenth century (and he is generally regarded as a reliable authority, for all that some three hundred years separated him from the events),

states that the first 'hand' to be evolved for Arabic writing was the Meccan, followed in due order by the Medinan, the Basran, and the Kufan—a sequence reflecting the course of urban development in the young Islamic state. In a list of the 'hands' employed in transcribing the Koran—a catalogue of names which has presented scholars with a sufficiency of problems to puzzle over—Ibn al-Nadīm repeats these four styles at the head of his inventory. Nevertheless, the term 'Kufic' has long been used to designate in a general way the script of the most ancient Korans preserved to us, as of contemporary coins and monumental inscriptions. Since the identification of the other early hands still remains speculative, it is proposed in this catalogue to follow convention and to call Kufic the first group of codices (Nos. 1–22); yet a glance at the plates will quickly suggest a considerable variety of styles.

The earliest calligrapher of the Koran known to Ibn al-Nadīm was a certain Khālīd ibn Abi 'l-Haiyāj, of whom nothing but the name is recorded; except that from the context it is clear that he lived in the first century of Islam; Ibn al-Nadīm had seen a copy of the Koran written by him. Either he, or Sa'd his castrated slave (?)—there is a difference of reading in the manuscripts—was engaged by the caliph al-Walīd I (reigned 705–15) to transcribe the Koran, poetry and traditional history, and to him is attributed a golden inscription of Suras xci–cxiv in the sanctuary of the Prophet's mosque at Medina. He charged highly for his services; for when he was commissioned by the pious 'Umar II (reigned 717–20) to calligraph a complete Koran in like style, the caliph, though admiring his product, found the fee excessive and returned it to the artist. The only other named calligrapher from Umayyad times was the ascetic Mālik ibn Dīnār (d. 127/745 or 130/748) of Basra, who took payment for his work. Ibn al-Nadīm's list of Abbasid calligraphers is naturally rather more extensive; he also names certain famous illuminators and binders.

None of the 'Kufic' Korans hitherto reported contains a colophon giving its date and the name of its copyist; apart, that is, from the patently forged signatures of the caliphs 'Uthmān and 'Alī and like

personalities. Notices of pious bequest enable us to assign a *terminus ante quem* to a few codices; the earliest of these, according to the late Professor D. S. Rice, yields a date not later than 264/876. Many copies—all are fragmentary—are certainly older than this, and scholars have established palaeographical criteria taking the series back to the beginning of the second century of Islam. Varieties of the normal 'Kufic' hand continued in common use down to the middle of the 4/10th century. All Korans down to that period were written on vellum, at any rate so far as surviving copies show; paper passed into common use about the turn of the ninth century, and our earliest non-Koranic manuscripts attest its employment generally. In western Islam, however, vellum remained in fashion very much longer.

Quite apart from the design of the scripts, 'Kufic' Korans are distinguished from their successors by the system of vocalization employed, and by the absence or paucity of diacritical signs to differentiate between certain groups of letters otherwise identical in shape. The usual controversy surrounds the history of these orthographical aids; the extant codices do little to clarify matters, owing to the tenacious conservatism of many Koranic scribes. By the time of the famous al-Khalīl ibn Ahmad (d. 170/786) the full range of signs now still in use had already been perfected; nevertheless the old system, or the lack of system, continued in practice for many decades thereafter. One codex in the Chester Beatty collection (Nos. 23–26) furnishes important evidence on this point, as will be mentioned presently.

A further distinction of 'Kufic' from other Korans is the arrangement of the writing on the page, making the breadth usually longer—often much longer—than the height. It was presumably the flimsier nature of paper, as compared with parchment, together with the exigencies of binding and stacking, which determined the shape of page which has almost invariably been used in manuscripts from the 9th century onwards. Apart from this, the size of the page differed widely, varying in this collection from 5.6 × 9 cm. (No. 13) to 30.3 × 42 cm. (No. 1).

The reader may trace for himself, from the descriptions of the individual codices and by examining the plates, the variety of calligraphic styles, the orthographical devices, and the kinds of ornament and illumination exhibited in this remarkable series of 'Kufic' Korans. Special attention is drawn to No. 4, three folios from a famous and noble codex, leaves of which are scattered over a number of libraries; the vellum has been dyed a dark blue, and the superb calligraphy, unpointed and unvocalized, has been executed in gold. No. 5 is a single leaf of illumination, very ancient, which has been discussed and reproduced elsewhere; as also has the illumination of No. 6. No. 16 contains a note of donation dated 298/911 and signed 'Abd al-Mun'im ibn Aḥmad, at Damascus. No. 18 is an extensive fragment, amounting to ninety-six folios. Nos. 8, 19, and 20 are unusually taller than they are long.

The second group of codices in this collection (Nos. 23-39) has been styled 'Persian' Kufic (otherwise called 'semi-Kufic', 'bent Kufic', or 'East-Persian Kufic'), to designate a hand, or rather a variety of hands, immediately recognizable by the diagonal characteristics, the orthography being uniform with that of the developed *naskh*. Hitherto it has been supposed that this script first appeared towards the middle of the 4/10th century, and that the earliest Koran written in this hand was one inscribed on paper and dated 361/972. Now, however, it is clear, from the evidence of Nos. 23 to 26, that a considerably earlier date must be assigned to the invention of this remarkable and, in its fullest refinement, most exquisite and decorative script. No. 26 (the four volumes are part of a set of the Koran in sections) contains a note, dated 292/905, stating that the signatory, Aḥmad ibn Abi 'l-Qāsim al-Khaiqānī, had then 'corrected' the transcription. The hand has certain resemblances to that of Chester Beatty MS. 3494, dated 279/892, as will be seen by comparing Plate 68 of my *Handlist of the Arabic Manuscripts*. (Other secular manuscripts in the Chester Beatty collection executed in 'Persian' Kufic are Nos. 3051 and 4000.) A detailed description and discussion of these volumes is printed in *Oriental College Magazine*, May and August 1964, pp. 9-16.

In No. 28, as in Nos. 23 to 26, both systems of vocalization, the 'Kufic' as well as the normal, are present; the normal, with other orthographical signs, having been apparently added later. No. 29 has only the normal vowels and signs, in no fewer than four different colours, as well as three introductory pages of gold illumination. No. 32 is vocalized after the Kufic manner, as also are Nos. 33 and 34; the latter contains a complete section of the Koran. No. 35, which comprises a very substantial part of the Koran, with two opening pages of gold and blue illumination, has Kufic vowels; so too has No. 36, with its remarkably large and handsome script. The ten folios of No. 37, magnificently calligraphed and sumptuously decorated, come from a very famous dispersed codex which E. Kühnel assigns to the 6/12th century, and Salahuddin al-Munajjed dates a century earlier.

Of this group the minority (Nos. 23-26, 29, 30) are written on vellum, the rest being executed on paper. Of the third group, designated as Early Naskh (Nos. 40-48), only the first is of vellum. It is not necessary to repeat here the evidence for a cursive hand, the ancestor of *naskh*, being practised side by side with the most ancient 'Kufic'; what is interesting about No. 40 is the use of a largely unpointed *naskh*, almost rustic in character, for the transcription of the Koran. This fragment certainly antedates all reported *naskh* Korans, and its assigning to the 4/10th century is cautious and conservative.

No. 41, a superbly calligraphed and delicately illuminated complete codex, dated 391/1000-1 at Baghdad and signed 'Alī ibn Hilāl, has been minutely described and lavishly reproduced in D.S. Rice's brilliant monograph *The unique Ibn al-Bawwāb manuscript in the Chester Beatty Library* (Dublin, 1955). Despite the detailed and erudite argument, Professor R. Ettinghausen is not convinced of the certainty of the attribution to Ibn al-Bawwāb, the most eminent of all Arab calligraphers, whose styles and methods are excitingly expounded and illustrated in a monograph by Muḥammad ibn Ḥasan al-Ṭībī, a disciple of the Ibn al-Bawwāb school, autographed in 908/1503, and published at Beirut in 1962.

No. 42, a quite small but complete copy with fine though damaged illumination, is also a very important relic of the early and sparsely attested school of *naskh* calligraphy, having a colophon with the date 428/1037. A century and a half separates this little volume from the next dated codex in the collection. No. 43 is a truly majestic creation, very large (it measures 43×31.5 cm.) and splendidly illuminated, dated 582/1186 and signed 'Abd al-Raḥmān ibn Abī Bakr ibn 'Abd al-Raḥīm al-Kātib 'Zarrīn-Qalam' ('Golden Pen'), who in this volume (to quote from the *Survey of Persian Art*) 'achieves designs in a half-dozen styles of script combined, distinct in form, scale, movement, weight, emphasis, and colour value. Such an arrangement is a veritable orchestration of soundless choirs.' This is the earliest example in the collection of the use of large script separated by bands of lines in smaller script, afterwards to become a particular feature of Persian calligraphy, here already contrived with masterly perfection. Ten years later, in 592/1195, Abū Nu'aim ibn Ḥamza al-Baihaqī compiled No. 44, a complete section of the Koran with the daintiest of ornamentation, otherwise returning to the undifferentiated style of a uniform, and uniformly perfect, hand.

Of the remaining four copies in this group one is dated, the other three undated; they display an interesting contrast of styles. No. 45 is notably large, 368 folios measuring 39×33 cm., with a rich complement of fully illuminated pages fore and aft. No. 46, of very modest size but with even more lavish decoration, was completed in 677/1278 at Konya (where the poet-mystic Jalāl al-Dīn Rūmī had but recently died), by al-Ḥasan ibn Jūbān ibn 'Abd Allāh of that city. No. 47 might be called an 'economy' Koran, very small (6.3×4.5 cm.) and inscribed in a minute hand, with a bare minimum of illumination, foreshadowing a distinctive Turkish fashion. In No. 48, a fragment, we encounter for the first time a full range of reading and notation symbols.

The fourth group, the Mamluk Korans (Nos. 49-118), ranges in date from the 7/13th to the 9/15th century; few of them contain dated colophons, some of them are of a massive size. The illumination,

often extremely spectacular, depends upon a rich palette which includes burnished gold and blood red, imparting an impression of opulent and sometimes of barbaric splendour. The series opens with three sets of fragments (Nos. 49 to 51) of what must have been a multifoliate copy, inscribed in unusually large script, only three lines to the page, the *alifs* measuring 4.5 cm. high. No. 53, a section of the Koran calligraphed entirely in gold, is encased in a fine Mamluk binding. Nos. 54 and 55 are single leaves remarkable as containing, between the lines of Arabic, versions in Persian and Turkish. No. 56, a large and splendid codex, is dated 720/1320. No. 57, equally massive, was commissioned by the Mamluk ruler al-Malik al-Nāṣir whose reign extended from 748/1347 to 762/1361; it is inscribed in the Persian style of bands of alternating size.

All the volumes Nos. 58 to 62 contain pages of rich illumination, whilst No. 63 has a fine Mamluk fretwork binding. No. 64 is noteworthy for its mixture of scripts, a feature of No. 66 also; No. 65, a majestic copy, contains an interlineary Persian translation. No. 67, like Nos. 49 to 51, has only three lines of very large *naskh* (*alif* 4.7 cm. high) to the page, and its binding is Mamluk. No. 69, a complete section calligraphed in gold, is dated 734/1334 and signed Amīr Ḥājj ibn Aḥmad al-Ṣā'inī: Nos. 70 to 73 belong to the same set. Sections by various scribes are contained in Nos. 74 to 90; of these, Nos. 75, 77, 79, 81, 83 (with an interlineary Persian translation) and 90 have Mamluk bindings, whilst No. 85 contains a note of donation dated 816/1413-14 in the name of the Mamluk ruler Barsbāy (d. 841/1438). No. 91 is a single leaf calligraphed in gold with black vowel signs; No. 92 contains two pages (50×35 cm.) of opening illumination. Nos. 93 and 94 make a pair of superbly illuminated calligraphy, measuring 74×49 cm.

Nos. 97 and 98 are Korans fashioned as scrolls. No. 97 is dated 767/1366 and signed Muḥammad ibn Mansūr ibn 'Alī al-Ḥanafī al-Ḥusainī al-Kakhtāwī, at Cairo. The script of No. 98, which is minute, from time to time forms patterns in a most interesting variety of calligraphic styles.

There follows a succession of signed and dated copies. No. 99, of 813/1411, was the work of Zain al-Dīn 'Abd al-Rahmān ibn Yūsuf ibn al-Ṣā'igh al-Kātib, the most eminent calligrapher of his time, who died in 845/1442. No. 100 is dated 832/1429, and was written for Barsbāy. No. 101, a majestic volume measuring 58.8 × 42.5 cm. with a splendid Mamluk binding, was calligraphed by Muḥammad Abu'l-Faṭḥ al-Anṣārī in 847/1444; al-Malik al-Zāhir (reigned 842-57/1438-53) donated it in 848/1444. No. 102, written for the Mamluk ruler Abū Sa'īd Khushqadam (865-72/1461-7), is signed Jānam ibn 'Abd Allāh al-Saifī (d. 888/1483). No. 103, which contains a donation note dated 873/1468, was commissioned by Mughlabāy ibn 'Abd Allāh al-Ibrāhīmī. No. 104, a truly superb codex (it measures 58.8 × 48 cm. and is finely illuminated), was executed for the great Qā'it-Bey (reigned 873-901/1468-95). No. 105, which has a Mamluk binding, is signed Aḥmad ibn Bakht Khujā al-Shāfi'ī al-Ṭarābulusī and dated 896/1491.

The volumes 109 to 118 comprise sections of Korans, all except 111 in Mamluk bindings; the last six are from a set of thirty.

The fifth group (Nos. 119-31) are Maghribī, from the far west of the Arab world, all undated, ranging from the 5/11th to the 13/19th century. The following are of vellum, the use of which continued much longer in Morocco and Moorish Spain than in the rest of Islam: Nos. 119 (a small fragment, calligraphed in gold with vowels in red, blue, and green), 120 (two folios only), 121 (a complete Koran in a minute hand), 122 (similar), 123 (the first three suras), 124 (a group of suras), 125 (a half of Sura 11), 126 (described as Section VI), and 127 (described as Section VII). No. 131 is an excellent example of the final phase of Maghribī calligraphy, and comprises the second half of the Koran.

The Persians excelled all other Islamic peoples in artistic creativeness, and it is therefore not surprising that the sixth group, the Persian (Nos. 132-83), should include the most exquisite examples, alike of calligraphy, illumination, and binding, in the whole collection. To contemplate their perfection of design and colour-blending is to enjoy a sublime spiritual experience. Many of the volumes in

this series, dating from the 7/13th to the 12/18th century, are the signed work of famous artists; here attention may be particularly directed to a choice selection, the most perfect specimens of the art of the book. No. 132 is calligraphed all in gold with vowels in blue, that favourite combination of hues which imparts such satisfying spirituality to Persian decoration. No. 133 is a striking union of silver with gold against a rose background. No. 136, dated 728/1328 and signed 'Abd Allāh al-Ṣairafī, gold script with blue vowels, a blend repeated in the illumination, has already been reproduced elsewhere; so too has No. 137, dated 738/1338 and signed 'Abd Allāh ibn Aḥmad ibn Faḍl Allāh ibn 'Abd al-Ḥamīd.

The script of the fragment No. 138 is all gold with blue vowels. No. 139, dated 834/1430-1 and signed 'Abd Allāh al-Harawī, shows a striking combination of styles in gold and black. No. 140, by Muḥammad ibn Muḥammad ibn 'Imrān al-Hanafī and dated 868/1464, is perhaps Turkish rather than Persian. No. 141, by the noted calligrapher 'Abd Allāh al-Ṭabbākh al-Harawī, dated 873/1467, is remarkable for its blue margins adorned with gold floral sprays. No. 142, a small copy, Turkish in style, is dated 884/1479-80 and signed Aḥmad ibn al-Sirāj al-Tibrizī. No. 144 combines blue with gold and black scripts; No. 147 alternates black with gold, being the work of the famous Zain al-'Ābidīn ibn Muḥammad al-Kātib of Shiraz, dated 888/1483, a pair with No. 148. No. 149 mixes gold and black. No. 151 is a series of choicely decorated section-openings.

The arrangement of No. 152, a fragment of what must have been a massive codex (it measures 52.3 × 36 cm.), is very unusual, with its double margins enclosing variant readings and a Persian commentary; signed by Ṣadr ibn Bā Yazīd ibn Ibrāhīm 'Fārsī', it is dated 903/1497-8. No. 153, dated 961/1554, is a splendid example of the work of Maqṣūd 'Alī al-Sharīf of Tabriz, called Maftūlband, with illumination by Bābā al-Tibrizī; the Persian binding is notably fine, as also are those of No. 155 (dated 982/1574-5) and No. 156 (signed Rūzbihān Muḥammad al-Ṭab'ī al-Shīrāzī) No. 159, which has a splendid lacquered binding, includes marginal Persian glosses

in a graceful *shikasta* hand. Fine bindings encase the splendid No. 162, the noble No. 163 (once in the library of the Mogul emperors), and the handsome No. 164. Nos. 167 and 169 also have remarkable bindings. No. 170, a scroll minutely lettered by Muzaffar ibn 'Abd Allāh al-Ḥusainī al-Māzandarānī, is dated 980/1572-3.

The art of calligraphy continued to be practised to perfection through the troubled centuries following the decline and fall of the Safavid dynasty. No. 172, dated 1084/1673, and No. 173, dated 1095/1684 and signed Mīrzā Aḥmad, are pretty volumes of modest size. No. 174, by Shāgird, includes on its margins, in elegant *nasta'liq*, the Persian commentary of Ḥusain Wā'iz Kāshifī (d. 910/1505). No. 176, a fragment, is lettered in gold on indigo with interlineary Persian translation in white. No. 177 has illumination by 'Abd Allāh ibn Muṭṭalib al-Mustaufī of Shiraz, calligraphy by Aḥmad al-Nairizī, and is dated 1125/1713. Nos. 178 to 181 have fine illumination and lacquered bindings. Nos. 182 and 183 are scrolls.

The Turkish Korans (Nos. 184-229) form a very interesting group. Extending from the 8/14th to the 13/19th century, it is notably important for fine examples of the last period, before printing finally put an end to the calligraphic tradition. Many of the volumes are dated, and the signed work of many famous penmen is represented; the illumination and the binding are of the highest order. The most important codices are the following. No. 184, dated 740/1339-40, a large and luxurious copy, was produced by Yaḥyā al-Ṣūfī. No. 185, a fragment of a famous Koran with outstandingly splendid illumination reproduced often elsewhere, has an interlineary Persian translation. No. 188 (by Muḥammad ibn Ghaibī) is dated 859/1455 and runs to 513 folios. No. 189, rhomboid in shape, is the work of Ḥamd Allāh called Ibn al-Shaikh who also calligraphed Nos. 190 and 193; his son Muṣṭafā Dedeh was responsible for No. 201. Ḥasan ibn Aḥmad al-Qaraḥīṣārī transcribed No. 195 in 977/1570 for Sultan Selim II. No. 200, alternately black and gold, was done by Yūsuf ibn 'Abd Allāh in 976/1568; No. 203

was calligraphed in 1095/1684 by Darwīsh Muḥammad ibn Muṣṭafā, No. 204 a year later by Darwīsh 'Alī. No. 206 is very curious, the whole Koran minutely inscribed on a single folio of linen.

No. 209 is dated 1119/1707-8 and signed 'Abd al-Raḥmān 'Chinjī-zāda'; the illuminator was 'Abd Allāh ibn Muṣṭafā, who also decorated No. 210 in 1121/1709-10 for 'Abd Allāh called al-Imām. No. 212 is dated 1160/1747 and is the work of Barbar-zāda. Abū Bakr Rāshid 'Ḥāfiẓ al-Qur'ān' wrote No. 215, al-Saiyid Ṣāliḥ 'Jamshīr Ḥāfiẓ' No. 216 in 1218/1803-4. Other dated 19th-century copies are Nos. 217 (1221/1806), 218 (1231/1816, by Muḥammad Shākir 'Ḥāfiẓ al-Qur'ān'), 219 (1236/1820-1), 220 (1247/1832, by Muṣṭafā al-Ḥilmī), 221 (1257/1841-2), 222 (1261/1845, with a solid silver binding case), 223 (1264/1848, calligraphed by Muṣṭafā 'Izzat 'al-Imām al-Thānī' for Sultan Abdul Majid), 224 (1267/1850-1), 225 (1284/1867), 226 (1285/1868-9, by Muḥammad Waṣfī), 227 (1288/1871-2), and 228 (1306/1889, by Ḥasan Riḍā). The illumination of some of these later copies shows European influence.

Indian, including Kashmiri, calligraphy and illumination owe much to the Persian masters, but the group in the Chester Beatty collection (Nos. 230-8) exhibit some individual features. No. 230 is notable for its margins stencilled Mogul-fashion with floral sprays. No. 231 is calligraphed in a large Bihari hand, with a marginal Persian commentary in *nasta'liq*. The minute and elegant script of No. 232 required only thirty-two folios to transcribe the entire Koran. No. 233 is a remarkably small copy, measuring 8 × 5 cm., yet contriving twenty-one lines to the page. No. 236, by a lady calligrapher in a large hand, has the body of the letters decorated with dots and is attractively illuminated. No. 237 is a very elegant little volume compiled in Kashmir by Aḥmad Shaikh in 1291/1874. No. 238 is a scroll.

West African Korans (Nos. 239-42), with their very individual calligraphy, have tenaciously preserved the very ancient tradition of being inscribed on loose sheets left unsewn and unbound, precariously held between leather ends or in a crude leather case and slung in a satchel.

The collection is rounded off by two sections (Nos. 243-4) calligraphed in China, with Chinese binding. The idiosyncratic hand resembles that of the lithographed Canton prayer-book reproduced in the *Encyclopaedia of Islam* (vol. i, plate x, between pp. 392 and 393); the illumination shows a remote affinity with the simpler Mamluk style.

The detailed history of illumination in Koranic manuscripts has yet to be written; its completion depends upon a far-reaching investigation of signed and dated—or accurately datable—codices, in which it is hoped that the present volume will be of some assistance. Valuable preliminary studies will be found in a number of the works listed in the bibliography. Presumably the first simple decoration to be introduced, apart from the diacritical points and vowel signs, was a symbol to indicate the end of verses—primarily a series of thin strokes, developing later into a circular or pear-shaped ornament, subsequently elaborated into a rosette. The sura-headings suggested themselves next for treatment; to begin with, distinguished from the rest of the text by being lettered in gold, they presently accumulated decoration in the form of multicoloured and patterned bands, supplemented by marginal ornaments. The groups of five and ten verses acquired their marginal symbols, and in the course of time the margins came to be crowded with a multitude of other graceful signs marking the division of the Koran into sections and portions with their subpartitions.

Full-page illuminated pages before and after the text were introduced at a quite early date, and No. 5 in this collection is a famous ancient example. In Korans of the 'Kufic', Mamluk, and Maghribī schools, these illuminated pages clearly show the influence of binding patterns, with their more and more intricate geometrical arabesques. In Persian, Turkish, and Indian Korans, these pages of dazzling beauty resemble rather the creations of the weaver's art, carpets and flowered silks. The floral designs were sometimes quite naturalistic, but that was the farthest the illuminators went in imitation of living objects; animal and human shapes were rigorously avoided.

In the pages which follow, brief descriptions are given of the 245 Korans, or sections, or fragments of Korans, which have been gathered by Sir Chester Beatty into his astounding Library. These notes will, it is hoped, be helpful to scholars, enabling them to make the corresponding identifications. They, together with non-specialist readers, will be delighted to turn to the plates which illustrate this austere handlist, to feast the eyes and entrance the mind on the dazzling spectacle of so much beauty.

HANDBLIST OF THE KORANS

KUFIC

1

A considerable fragment containing from Sura XIII. 34 to Sura XVIII. 110.

Twenty folios of firm vellum, measuring 30.3 × 42 cm., 13 lines to the page. The script is thick and very regular; vowels are marked in red after the usual Kufic manner. Verse-endings are indicated by three dashes. *Alif* is 1.0 cm. high. To be noted are the cusped finials.

The binding is fairly modern, blind-tooled red leather.

Comparable scripts are Della Vida III, Munajjed 3, Vajda 1.

(MS. 1401)

2

A fragment containing from Sura VII. 157 to Sura IX. 31.

Ten folios of firm vellum, measuring 18.3 × 25 cm., 14 lines to the page. The script is upright and very regular; vowels are marked in red and black, and some diacritical points have been added. Verse-endings are not marked. *Alif* is 0.5 cm. high.

The binding is modern, green leather.

Comparable scripts are Della Vida VI, Munajjed 4 (2), Vajda 6a.

See Plate 11.

(MS. 1402)

3

A fragment containing Sura LXXV. 10-29.

Seven folios of firm vellum, measuring 10.5 × 18.7 cm., 5 lines to the page. The script is thick and regular; vowels are marked in red and yellow. Verse-endings are indicated by a crude ornament. *Alif* is 1.8 cm. high.

The binding is modern, red leather.

Comparable scripts are Della Vida VIII, Munajjed 5 (1), Vajda 6b.
(MS. 1403)

3^a

An incomplete Koran.

Two hundred and one folios of firm vellum, measuring 38 × 47 cm., 19 lines to the page. The script is upright, thick, and very regular; vowels are marked in red. *Alif* is 1.0 cm. high. Ornamental bands of coloured design mark the beginnings of Suras.

The binding is Mamluk, brown leather flapped.

Comparable scripts are Della Vida VIII, Munajjed 5 (1), Vajda 6b.
(MS. 1404)

4

A small fragment containing Sura II. 57-95.

Three folios of firm, deep blue vellum, measuring 27.6 × 36.7 cm., 15 lines to the page. The very beautiful script is executed in gold and is unvocalized. Verse-endings are marked with circular ornaments. *Alif* is 1.2 cm. high.

The binding is modern, dark-green leather.

See Martin, pl. 141; Arnold-Grohmann, p. 20; Upham Pope III, p. 1944; Munajjed, 5 (2).

See Plate 12. (MS. 1405)

5

One leaf of illumination, presumably detached from a Kufic Koran.

One folio of firm vellum, measuring 12.0 × 28.5 cm. The illumination has been executed in gold and black.

See Martin, pl. 234; Ettinghausen, p. 168.

See Plate 13. (MS. 1406)

6

A small fragment containing odd leaves from Sura XXIX. 43 to Sura LXIV. 7.

Four folios of firm vellum, measuring 21.8 × 32.3 cm., 5 lines to the page. The script is thick and very regular; vowels are marked in red and black, and verse-endings indicated by circular ornaments.

Alif is 2.6 cm. high.

The first and last two pages are illuminated in gold and black.

The binding is modern, green leather.

Comparable scripts are Della Vida VII, Munajjed 3, Vajda 6b.

For the illumination see Martin, pl. 233; Kühnel, p. 27.

See Plates 14-16. (MS. 1407)

7

A fragment containing from Sura XXXV. 33 to Sura XXXVI. 17.

Nine folios of firm vellum, measuring 16.2 × 23.2 cm., 6 lines to the page. The script is upright and very regular; vowels are marked in red. *Alif* is 1.6 cm. high.

The binding is fairly modern, blue silk boards.

Comparable scripts are Della Vida XIII, Munajjed 2 (2), Vajda 2.
(MS. 1408)

8

Fragments containing from Sura LXV to Sura LXVII. 1 and from Sura LXXV. 16 to LXXVII. 29.

Fourteen folios of firm vellum, measuring 12.3 × 9 cm., 9 lines to the page. The script is upright and regular; vowels are marked in red, blue, green, and yellow. Verse-endings are marked with three dots in triangle. *Alif* is 1.0 cm. high.

The binding is modern, green leather.

Comparable scripts are Della Vida VI, Munajjed 3, Vajda 2.

See Plate 17. (MS. 1409)

9

A large fragment containing from Sura LXV to the end of the Koran.

Ninety-one folios of firm vellum, measuring 10.3 × 18.3 cm., 8 lines to the page. The script is upright and regular; vowels are marked in red and green. *Alif* is 1.0 cm. high.

The binding is modern, red leather.

The script is very similar to that of No. 8. (MS. 1410)

10

A fragment containing from Sura XCIII to the end of the Koran.

Eleven folios of firm vellum, measuring 12.8 × 20.2 cm., 10 lines to the page. The script is upright and regular; vowels are marked in red and blue. *Alif* is 0.8 cm. high.

The first and last pages are illuminated in gold, red, and blue.

The binding is modern, red leather.

The script is similar to that of No. 8.

See Plates 1 and 18. (MS. 1411)

11

A small fragment containing from Sura XVIII. 12 to Sura XVIII. 73.

Eleven folios of firm vellum, measuring 15.5 × 22.2 cm., 10 lines to the page. The script is upright and very regular; vowels are marked in red and green. Verse-endings are indicated by a pear-shaped ornament. *Alif* is 1.0 cm. high. The first leaf is illuminated in gold.

The binding is modern, red leather.

The script is similar to that of No. 8. (MS. 1412)

12

Fragments from Sura XLII to Sura XLV.

Nineteen folios of firm vellum, measuring 14.3 × 21.5 cm., 12 lines to the page. The script is upright and regular; vowels are marked in red and green. Verse-endings are indicated by a pear-shaped ornament. *Alif* is 1.0 cm. high.

The binding is Turkish, flapped brown leather with sunk gilt ornaments.

The script is similar to that of No. 8. (MS. 1413)

13

Fragments from Sura LXXI. 3 to Sura c.

Twenty-one folios of firm vellum, measuring 5.6 × 9 cm., 13 lines to the page. The script is very small, upright and fairly regular; vowels are marked in red. *Alif* is 0.2 cm. high, without finials.

The binding is blind-tooled dark-brown leather.

A comparable script is Munajjed 4 (2). (MS. 1414)

14

A fragment containing from Sura LVII. 22 to Sura LXIV. 2.

Thirty-seven folios of firm vellum, measuring 10.7 × 16.7 cm., 9 lines to the page. The script is upright and regular; vowels are marked in red and green. Verse endings are indicated by a circular ornament. *Alif* is 1.2 cm. high.

The binding is fairly modern, red leather.

The script is similar to that of No. 8. (MS. 1415)

15

A fragment containing from Sura II. 254 to Sura III. 88.

Thirty-three folios of firm vellum, measuring 11.5 × 17.8 cm., 5 lines to the page. The script is thick and regular; vowels are marked in red, black, blue, and yellow, and some diacritical points have been added. *Alif* is 2.0 cm. high.

The first and last pages are illuminated in gold.

The binding is fairly modern, black leather.

The script is similar to that of No. 6. (MS. 1416)

16

A small fragment containing from Sura xxii. 76 to Sura xxii. 78.

Three folios of firm vellum, measuring 21×31.2 cm., 9 lines to the page. The script is upright and very regular; vowels are marked in red and black, and some diacritical points have been added. Verse-endings are indicated by a pyramid of dots. *Alif* is 1.5 cm. high.

Folios 2*b* and 3*a* are illuminated in gold and red.

Folio 3*b* contains a donation note by 'Abd al-Mun'im ibn Aḥmad dated, at Damascus, Dhu'l-Qa'da 298 (July 911).

The binding is modern, green leather.

The script is similar to that of No. 6.

See Plates 19 and 20.

(MS. 1421)

17

Two small and separate fragments.

Five folios of firm vellum, measuring 18.5×26 cm., 6 and 15 lines to the page. The scripts are upright and regular; vowels are marked in red and green, and in red respectively. Some diacritical points have been added. *Alif* is 2.4 cm. high.

The binding is modern, green leather.

The script is similar to that of No. 6.

(MS. 1422)

18

An extensive fragment.

Ninety-six folios of firm vellum, measuring 18.5×26 cm., 15 lines to the page. The script is upright and regular; vowels are marked in red. Verse-endings are indicated by a circular ornament. *Alif* is 0.7 cm. high.

The binding is fairly modern, red leather.

The script is similar to that of No. 8.

(MS. 1423)

19

A fragment containing from Sura xi. 116 to Sura xv. 88.

Eighteen folios of firm vellum, damaged, measuring 21×16.2 cm., 22 lines to the page. The script is upright and regular; vowels are marked in black, green, red, and yellow.

Unbound.

(MS. 1616)

20

A fragment containing from Sura xiii. 22 to Sura xviii. 81.

Thirteen folios of firm vellum, measuring 18.5×13 cm., 6 lines to the page. The script is upright and regular; vowels are marked in black, green, red, and yellow.

Unbound.

(MS. 1617)

21

A fragment containing from Sura xxi. 1 to Sura xxi. 36, being the beginning of Juz' xvii.

Twenty folios of firm vellum, damaged, measuring 17×22.7 cm., 5 lines to the page. Vowels are marked in black, red, and yellow.

Folios 2*b*, 3*a-b*, and 4*a* are illuminated in gold, red, and blue.

Unbound.

(MS. 1618)

22

A fragment containing from Sura x. 83 to Sura xi. 60.

Sixty folios of firm vellum, measuring 12.5×18.5 cm., 7 lines to the page. The script is upright and regular; vowels are marked in red, green, and yellow. *Alif* is 1.3 cm. high.

The binding is red leather, the margins gold-tooled.

The script is similar to that of No. 6.

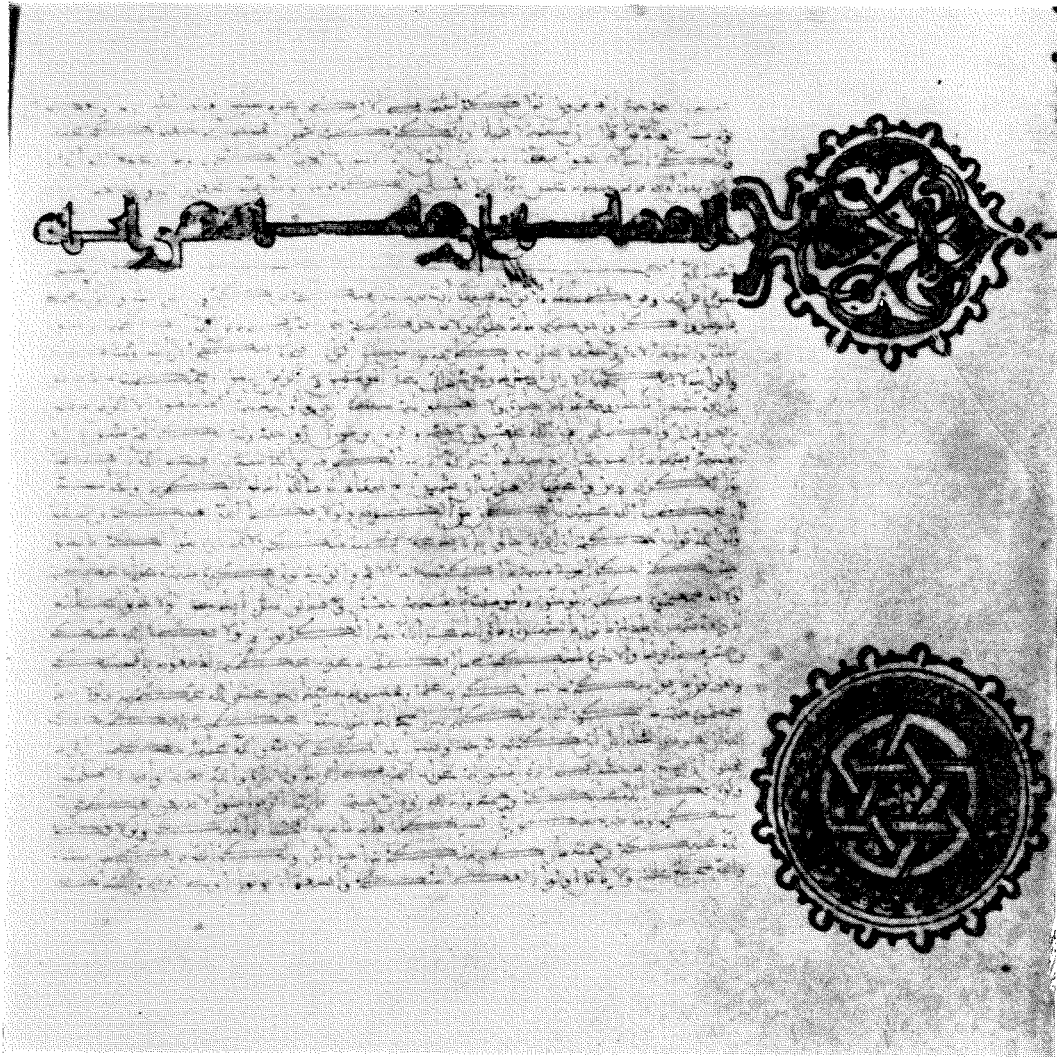

PLATE 42

يَقْرُونَ عَلَى اللَّهِ كَذِبًا وَيَكْفُرُونَ
بِهِ بِأَكْبَارَ مَسِيئَاتِهِمْ لَمْ يَأْتُوا بِالْحُجُجِ
وَلَوْ أَنَّ صِرَافَ كَذِبِهِمْ يُوقِنُونَ
بِالْحَقِّ وَالْحُكْمِ وَيَقُولُونَ
لَوْلَا فَتَنَّا آلِهَتَنَا
لَإِذَا نَزَّلْنَاهُ مِنَ السَّمَاءِ لَأَنزِلُكُمْ
أَلْفًا مِّن مَّقَالِمٍ لَّعَلَّكُمْ تَعْقِلُونَ
فَلْيَحْكُمْ لَهُ صِرَافَ كَذِبِهِمْ
